DETAILED ACTION

Election/Restrictions

Examiner has taken into account the Applicant's comments in the 1/23/04 Response. Examiner agrees to add claims 55-62, 64-68 to the elected Group I claims. Hence, the claims elected by the Applicant are: 1-3, 5, 7, 12, 14-17, 24-27, 33-49, 55-62, and 64-68.

Claims 1, 12, 24, 33 link(s) inventions Group I and Group II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1, 12, 24, 33. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Furthermore, Examiner has found linking claims 1, 33 to be allowable. Thus claims 8-11, 50-54 are rejoined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12, 14-17, 24-27, 66-68 are rejected under 35 U.S.C. 102e as being anticipated by Nemoto et al. (6025213).

Nemoto et al. teaches a chip-scale package for photonic devices, comprising: a first housing having an electrically conductive internal pad; a chip attached relative to said first housing, the chip having an electrically conductive pad that faces the window, and a window attached relative to said first housing, wherein the internal pad of the housing faces said window; at least one conductive trace formed on said window; and wherein the at least one conductive trace is electrically connected to the pad of said chip and to the internal pad of said first housing. (figs. 7A-7B, 9A-9B, 14A-14F, 15A-15D, 16, 18, 20).

Thus claim 12 is met.

By the reasons and references given above each and every element of claims 14-17, 24-27, 66-68 are met.

Allowable Subject Matter

Claims 1-3, 5-11, 33-65 are allowed.
